

AMAN BHATNAGAR

Mandsaur, Madhya Pradesh | +91 7974861912 | mr.amanbhatnagar@gmail.com | linkedin.com

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Computer Science Engineering graduate with a strong foundation in software development, data science, and cybersecurity. Proven track record of building AI-powered healthcare models and vulnerability scanning web applications. Adept at leveraging Python, SQL, and Machine Learning libraries to solve complex technical problems and optimize system performance.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, PySpark, JavaScript, HTML, CSS
- **Libraries & Frameworks:** Scikit-learn, NumPy, TensorFlow, Pandas, Matplotlib
- **Tools & Platforms:** Git, GitHub, VS Code, Jupiter Notebook, Anaconda, Power BI, Tableau, PyCharm
- **Operating Systems:** Linux OS, Windows OS, MacOS

KEY PROJECTS

ProDoc: AI-Powered Virtual Health Care

B. Tech (CSE) Final Year Project | 2025

- Designed and deployed an AI-powered system to analyse patient health reports, predict potential diseases, and suggest medical precautions.
- Integrated real-time monitoring features for vital health parameters including heart rate and blood pressure to enhance diagnostic accuracy.
- Implemented secure data protocols to facilitate seamless communication between patients, healthcare providers, and emergency contacts.
- Technologies Used: Python, Machine Learning, Data Analytics, Healthcare APIs

KinetQ AI: High-Performance Vector Search & RAG Feature Store

Python Internship at SGI | 2022

- Architected end-to-end RAG pipeline transforming text to dense 384-D vector embeddings.
- Eliminated infra overhead by running native cosine similarity scoring inside PostgreSQL.
- Boosted search accuracy via hybrid engine blending SQL full-text & mathematical vectors.
- Secured zero data duplication using idempotent SQL constraints to prevent embedding drift.
- Technologies Used: Python, Transformers, PostgreSQL, Vector Search, SQL, RAG Architectures

Neura-Sec: Cyber Vulnerability Scanner and Awareness Portal

DCA Final Year Project | 2021

- Developed an advanced cybersecurity web application to identify, analyse, and mitigate digital security threats for end-users.
- Integrated robust scanning tools including website vulnerability scanners, password strength checkers, and phishing URL detectors.
- Technologies Used: HTML, Web Security Frameworks, Frontend Technologies

Electro-Fortres: Advanced Room Security System

ITI (Electrical) Final Year Project | 2020

- Engineered a physical security mechanism using touch-sensor fencing, dual-layered heavy metal gates, and body sensors.
- Implemented an automated electromagnetic deadbolt system triggered by motion detection and floor weight thresholds.
- Designed a fail-safe backup system powered by an independent basement generator to maintain security continuity during power outages.

EDUCATION

- **B.Tech in Computer Science & Engineering (CSE)**

Shre Yogendra Sagar Ins.of Tech. & Science(RGPV) | *Passing Year:2025* | **Score: 7 CGPA**

- **Bachelor of Commerce (B.Com CA – {Distance})**

Maharishi Mahesh Yogi Vedic Vishwavidyalaya | *Passing Year: 2024* | **Score: 68.53%**

- **Diploma in Computer Applications (DCA)**

Sunrise Group of Institute, Mandsaur (MCU) | *Passing Year: 2021* | **Score: 93.00%**

- **ITI (Electrical)**

Sharadha PVT. ITI, Mandsaur (NCVT MIS) | *Passing Year: 2020* | **Score: 79.64%**

- **Higher Secondary School Certificate (12th - HSC)**

High Secondary School, Mandsaur (MPSOS) | *Passing Year: 2020* | **Score: 63.66%**

- **Secondary School Certificate (10th - SSC)**

Jain Boys H S School, Mandsaur (M.P. Board) | *Passing Year: 2016* | **Score: 51.33%**

CERTIFICATIONS

- **Python Internship** – SGI
- **Data Science (ML, DL, NLP) Certification** – Udemy
- **Python Programming** – GUVI
- **Cyber Security Foundations** – Career Tec.

LANGUAGES

- English (Professional)
- Hindi (Native)
